

Application No. 10/622,075

Resubmission of Amendment (dated March 8, 2005) dated June 29, 2005

Reply to Notice of Non-Compliant Amendment of June 23, 2005

Amendments to the Claims

This listing of claims will replace all prior versions and listings of claims in this application:

Listing of Claims

1-24. (Cancelled).

25. (New) An apparatus for winding wire coils onto a dynamo-electric machine component comprising:

a plurality of needle supports respectively disposed in adjacent parallel planes, the needle supports respectively supporting a plurality of wire dispensing needles collectively disposed in a single plane parallel to the adjacent parallel planes of the needle supports;

an actuation mechanism configured to translate the needles substantially parallel to the adjacent parallel planes to stratify the wire coils being wound onto the machine component; and

wherein wires being fed to the needles pass substantially perpendicularly through the parallel adjacent planes of the needle supports to reach the plane of the needles, and wherein the wires are substantially redirected in the plane of the needles to be received by the needles.
